PROFESSIONAL SUMMARY

AI-driven GTM and Revenue Operations professional with 5 years of experience driving revenue growth, building scalable operational systems, and automating business workflows through analytics and AI. Proven track record of translating business problems into technical solutions using Python, SQL, CRM platforms, Power BI, and machine learning.

Recognized as a top revenue performer with four promotions in approximately two years at upGrad and awarded for delivering measurable business impact at Presbyterian Living. Experienced in developing predictive lead scoring models, executive reporting platforms, AI-powered customer engagement tools, and GTM analytics that improve pipeline visibility, marketing effectiveness, and operational efficiency. Passionate about building AI-enabled products that help sales, marketing, and operations teams move faster and make better decisions.

PROFESSIONAL EXPERIENCE

Manager, Revenue Operations & GTM Strategy **January 2026 – Present**
Presbyterian Living *Skokie, IL*

- Built executive Revenue Operations reporting infrastructure by integrating CRM, occupancy, marketing, referral, and operational datasets into automated Power BI dashboards used by executive leadership to monitor sales performance, pipeline health, and business growth across multiple senior living communities.
- **Engineered predictive lead scoring architectures** to segment pipeline data, increasing sales velocity by routing high-value opportunities instantly.
- Independently conceptualized, designed, and developed an AI-powered customer engagement platform that combined conversational AI, personalized senior living recommendations, financial affordability guidance, and automated lead qualification to modernize the customer experience during the company's digital transformation initiative.
- Collaborated with executive leadership, marketing, IT, and engineering teams to identify operational bottlenecks and rapidly prototype AI-driven solutions that streamlined customer engagement workflows and improved lead management processes.
- Designed automated sales funnel reporting and KPI frameworks that standardized performance measurement across marketing and sales teams, creating a single source of truth for conversion metrics, campaign effectiveness, occupancy trends, and executive reporting.
- Automated recurring reporting workflows using Python, Power BI, and Excel, reducing manual reporting effort while improving reporting accuracy, consistency, and delivery speed for weekly and monthly executive reviews.
- Delivered strategic business analyses on marketing attribution, referral performance, conversion trends, occupancy forecasting, and sales effectiveness, providing actionable insights that supported executive decision-making and revenue planning.
- Recognized with the **Day One Plus Award** for exceptional initiative, innovation, and business impact after independently developing AI-powered business solutions and significantly improving operational reporting capabilities.

GTM Strategy & Growth Operations Lead **September 2021 – July 2024**
upGrad *Bangalore, KA*

Previous Roles: Learning Consultant → Senior Learning Consultant → Principal Learning Consultant → Sales & Strategy Manager

- **Promoted four times within approximately two years**, progressing from an individual contributor to **Sales & Strategy Manager** based on consistent business impact, revenue generation, leadership, and strategic execution.
- Played a key role in scaling a new business vertical from **₹0 to ₹70 Cr** by designing KPI frameworks, operational processes, performance dashboards, and data-driven sales strategies that supported sustainable business growth.
- Recognized as **Highest Revenue Performer on three occasions** for consistently exceeding revenue targets and driving profitability through a consultative, data-driven sales approach.
- Built and optimized end-to-end lead management and sales tracking processes using CRM platforms, improving pipeline visibility. **Optimized speed-to-lead workflows**, reducing average lead response times by 82% to dramatically increase inbound conversion rates.
- Partnered with Sales, Marketing, and Business leaders to analyze customer acquisition funnels, campaign performance, and sales feedback, contributing to a **38% reduction in Customer Acquisition Cost (CAC)** through continuous optimization of targeting and conversion strategies.
- Developed forecasting models, lead segmentation frameworks, and performance tracking dashboards that improved Marketing Qualified Lead (MQL) conversion rates by **20%** and enabled leadership to make data-driven resource allocation decisions.
- Redesigned collections and revenue recovery workflows by leveraging operational analytics and automation, increasing payment recovery rates from **58% to 95%** within a single quarter.
- Led performance management and coaching for an **11-member sales team**, introducing KPI-driven reviews, structured coaching plans, and operational dashboards that improved productivity and contributed to multiple internal promotions.
- Collaborated cross-functionally with Product, Marketing, and Operations teams to transform customer feedback, sales insights, and CRM analytics into actionable recommendations that improved customer experience, sales execution, and overall business performance.

IT Business Analyst Intern **May 2025 – August 2025**
Select Medical *Mechanicsburg, PA*

- **Centralized cross-functional data streams** to eliminate reporting silos, delivering real-time pipeline visibility to executive leadership.
- Automated the IRS 1099 reporting process using SQL and Excel VBA, reducing manual processing time by **40%**, improving reporting accuracy, and strengthening audit readiness.
- Analyzed historical financial and operational data to evaluate travel vendor performance, delivering recommendations that contributed to a **25% reduction in organizational travel costs**.
- Consolidated, validated, and reconciled **90+ financial datasets** spanning multiple business functions, creating a standardized dataset that improved forecasting accuracy and cross-functional reporting.
- Partnered with Finance, Revenue Cycle, and Business Intelligence teams to streamline reporting processes, improve data quality, and support executive decision-making through reliable financial insights.

Sales and Operations Executive **June 2020 – June 2021**
Mycaptain *Bangalore, KA*

- Built and scaled a nationwide student ambassador program across **100+ colleges**, increasing qualified lead generation by **5x** through structured recruitment, training, and performance management.
- Designed automated operational workflows and Google Sheets dashboards that reduced manual administrative effort by **40%** while improving visibility into ambassador engagement and campaign performance.
- Recognized as **Highest Revenue Performer** for consistently exceeding sales targets and driving customer acquisition during a major product launch through a consultative, data-driven sales approach.
- Developed structured performance tracking frameworks that enabled leadership to monitor lead generation, conversion performance, and ambassador productivity across multiple regions.
- Collaborated with Marketing and Operations teams to optimize outreach strategies, customer engagement, and lead qualification, supporting rapid business expansion and improved revenue performance.

Senior Inside Sales Manager <i>Simplilearn</i> - Delivered consultative sales engagements for technology education programs, consistently exceeding revenue targets within weeks of joining the organization. - Improved customer satisfaction by 35% through structured discovery conversations, personalized learning recommendations, and proactive follow-up. - Maintained CRM data quality, sales pipeline hygiene, and forecasting accuracy while collaborating with Marketing and Sales teams to improve conversion performance.	June 2020 – June 2021 <i>Bangalore, KA</i>
Graduate Teaching Assistant <i>Pennsylvania State University</i> - Supported capstone courses in Marketing Strategy, Supply Chain Strategy (UG) and Strategic Management (MBA). - Reviewed 260+ student submissions including Harvard/Stanford case studies and team research projects.	August 2024 – May 2025 <i>University Park, PA</i>

SELECTED AI & TECHNICAL PROJECTS

AI Customer Engagement Platform (Senior Living Advisor) Next.js TypeScript Gemini Vercel Prompt Engineering RAG - Designed and developed an AI-powered customer engagement platform that delivers personalized senior living recommendations through conversational AI, helping prospective residents navigate care options, pricing, and community selection. - Implemented Retrieval-Augmented Generation (RAG) by integrating structured organizational knowledge into LLM responses to improve answer relevance and reduce hallucinations. - Built dynamic lead qualification workflows that capture customer preferences, care requirements, budget, and location while generating structured sales-ready lead information. - Developed an integrated affordability calculator to estimate monthly costs based on customer inputs, improving transparency during the decision-making process. - Leveraged Cursor AI and modern AI-assisted development workflows to rapidly prototype, iterate, debug, and deploy new product features.	
Predictive Lead Intelligence Platform Python XGBoost Pandas Power BI - Developed a machine learning model using XGBoost to predict lead conversion probability and classify prospective customers into High, Medium, and Low priority segments. - Engineered customer behavioral, demographic, and sales engagement features to improve model performance and support sales prioritization. - Integrated prediction outputs into executive dashboards, enabling sales teams to prioritize outreach and identify high-potential historical opportunities. - Built probability-based reporting that improved pipeline visibility and supported data-driven sales planning.	
GTM Funnel Intelligence Dashboard Power BI SQL CRM Analytics - Built executive dashboards tracking marketing attribution, funnel conversion, lead velocity, deposits, move-ins, and sales performance across multiple communities. - Automated KPI reporting and created standardized business metrics used by leadership to monitor marketing effectiveness and revenue pipeline health. - Designed interactive drill-down reports supporting executive decision-making across sales, marketing, and operations teams.
